436 An elongated, violet bead, with white stripes, inganga, is more valuable: one inganga bead equals one kete of samsam beads. Still more valuable are the thick white amaguru beads; a double necklace of these is valued at 10 kete of samsam beads. In addition to these, there are, especially in the lake region, medium-sized blue beads and reddish and white ones with a lacquer-like sheen, also large spindle-shaped white beads with red circles, and others. All these types, however, do not have a fixed monetary value, [77] like those mentioned above; their exchange value fluctuates. Yellow, green, and black beads are not accepted anywhere.

435 Naturally, the available stock of beads and the law of supply and demand also determine the value of the "monetary" beads. In general, these were the rates of exchange which formerly applied in the interior: 5 bananas = 1 heller, 1 bunch of about 20 bananas = 1 kete, more than 2 double handfuls of flour = 1 kete, 1 handful of salt = 1 kete, 1 pot of beer = 3 kete, 1 iron hoe = 6 kete, 1 pot of honey = 1 ifundo, 1 goat = 3 ifundo, 1 sheep = 4 ifundo, 1 bull = 5 to 10 ingoje, 1 cow = 20 ingoje. At present, one goat costs as much as 3 to 4 rupees in the interior, and all other prices have risen proportionately.

439 435 Cotton material which was formerly strictly banned by the chiefs is now accepted eagerly in the interior. The most popular brand is the ordinary white "amerikani" of which 1 gora of 30 ells [an ell is between 55 and 80 centimeters] is valued at approximately 12 rupees in the interior. The "lesso" or "kanga," printed materials with brown patterns which are popular in Ruanda, are gradually being introduced all over Urundi.

804 The double handful (kumaschi) or, on the markets, a pumpkin shell of equal capacity is the generally accepted dry measure for flour, grain, beans, etc. Larger items, like manioc roots, sweet potatoes, bananas etc., are sold by the 804 piece. There are no domestic weights. The farsalah (35 pounds 177 Brit.) used all over East Africa since Arab times has only been

804 introduced here through contact with foreigners in the export
177 trade. It is used, for instance, for cattle hides, ivory, and wax.
The use of cowrie shells as money is known neither in
[436] Urundi nor in Ruanda.

3. Handicrafts

463 In his excellent book, Handwerk und Industrie in Ostafrika
433 [Handicraft and Industry in East Africa], (L. Friederichsen & Co., Hamburg, 1910) F. Stuhlmann writes: "It must be emphasized that in Africa handicrafts are almost everywhere only a matter of secondary importance; the basis of the economy is agriculture" (p. 3). This also applies to Urundi where handicrafts are, for the most part, "homework," that is, raw products are worked for one's personal use at home, and only the surplus is traded for the products of others. Home industry, that is, the production in quantity at home for the use of others and for export, exists only for pottery and iron-working. On the other hand, there is
[437] also the practice of paid labor whereby the craftsman is paid for manufacturing items at the house of the person who ordered them, using raw material furnished by this person, for example, in the production of barkcloth, the construction of a hut, and wood carving. Of course there are skillful and unskillful people in every trade and in every family, and the products of the former are naturally preferred to those of the latter. Only in pottery
463 and ironwork is the craft passed on from father to son. It is
462 mainly the Batwa who practice these two crafts and pass them on
563 from generation to generation, but there are also Bahutu families in which pottery and ironwork are hereditary (No. 19, p. 369). Ironwork, wood carving, and the production of barkcloth are exclusively reserved to men, plaiting and basketry to women. Among the Bahutu, pottery, too, is only made [78] by women; among the Batwa it is mainly done by women but to some extent also by men (No. 19, p. 451).

323 Pottery (inkono, pot) is of course practiced predominantly where the suitable type of clay occurs. This is the case in many
